REPORTS

Item 7.1 – Management Report

Mr. Classe reported that he had a brief conversation with Vice Chair Sasso on how to implement affordable housing within the District, which will be discussed under Item 8.4.

Mr. Classe gave an update on the District website. The District team met and began various improvements and enhancements to the District website to implement easier and better public access for District information. The District anticipates completion in June. Mr. Classe suggested one Board Member work with Mr. Classe and District staff to finalize the new logo for the June deadline. Chair Garcia asked if anyone would like to volunteer and Vice Chair Sasso offered to help.

Mr. Classe gave an update on a request from Supervisor Aungst regarding District guardrails. Mr. Classe reported that this has been a topic with the media recently about improperly installed or mix-matched parts used on guardrails. 28 guardrails were identified in the request. 10 are located on District maintained roadways and the remaining 18 are located on FDOT maintained roadways. The District team completed an immediate inspection and began the process for engineering evaluation, design and construction for necessary improvements or upgrades. For all District roadway projects the designs and including guardrails are completed within accordance with the then current standards program published by the FDOT, which change overtime. In 2017, the District contracted with a professional engineering firm to identify cost and prioritize any guardrail or barrier sections that were in need of repair. In 2018, the District began a multi-year program to replace or upgrade the existing guardrails within the District. 30 of 102 locations have been addressed. March 2023 a second media inquiry was received that included several repeat locations but some new locations as well. 69 locations were identified with 38 located on District maintained roadways. The District guardrail locations identified in both inquiries are the first priority for improvements. The District has engaged a professional engineering firm to complete an update and review of all guardrail locations on District property using the same guidelines as FDOT. The analysis is expected to be completed in the new 30 days and will provide guidance to prioritize any immediate improvements necessary to address urgent safety measures as well as replace older guardrails based on the new design standards.

Mr. Classe spoke about Agenda Item 8.6 – Special Advisor to the Board. Staff would support and recommend a Special Advisor to help the Board as well as the new District Administrator through the transition process. Vice Chair Sasso agreed that it would be beneficial for Mr. Classe to be a Special Advisor to the Board and requested the topic to be placed on the next agenda. No action required.

Item 7.2 – Presentation by Public Resources Advisory Group (PRAG)

Wendell Gaertner, Senior Managing Director and his partner Marianne Edmonds from PRAG (the District's Financial Advisor) gave a presentation to the Board on their goals with the District, the scope of their assignment and the work that they have done with the District. Mr. Gaertner talked about their role as a Financial Advisor and the services they provide. They have reviewed District documents such as meeting agendas, policies, financial statements, and bond documents as well as continuing disclosure documents. They have spoken with District Administration, Finance staff, external auditors, Bond Counsel, Disclosure Counsel, consulting engineers, Bond Trustees and can provide references to any documents referenced in this presentation. The District has enacted formal Board approved financial policies including a debt policy, post issuance policy, disclosure policy and investment policy. Mr. Gaertner stated that the policies appear appropriate and they have not found any instances of non-compliance with the existing policies as well as relevant statutes and any bond covenants. Mr. Gaertner then provided a brief overview of the financials of the utility services provided in the District and its ratings and debt obligations, summarizing they are financially sound. He also referenced the current Labor Services Agreement with Reedy Creek Energy Services and their obligations to the District concerning setting the utility rates as outlined in the agreements. PRAG inferred that the District should hire dedicated staff to review these rates

and future utility capital needs. Mr. Gaertner recommended the Board authorize a fund balance policy as well as a third party utility rate consultant to review the utilities rates annually.

After a brief discussion regarding the recommendation from PRAG, a motion was made by Supervisor Ziegler and duly seconded; the Board unanimously approved the request.

Item 7.3 – Acting General Counsel Report

Mr. Dan Langley announced that in his review of the District's operations, he noticed the lack of enforcement procedures of the Fire Prevention Code. He requested support from the Board to explore the creation of such enforcement procedures for future Board approval. The Board was in consensus of such action, no formal motion was required.

He deferred his report for on the topic of urban planning to further in the meeting under Item 8.4. He then proceeded to show examples of the effects of the previously discussed Restricted Covenant Agreements and discussed the potential development of lands per the new Board's vision.

Mr. Langley addressed the subject of pending litigation in regards to the tax assessments with Orange County. He recommended they make a formal motion to have existing counsel change their strategy to aggressively pursue the finalization of these cases and free up reserves. A motion was made by Supervisor Aungst in favor of the recommendation adding that the Board hire their own independent appraisal of affected properties. The motion was seconded by Vice Chair Sasso and passed unanimously.

Lastly, Mr. Langley addressed the Eminent Domain powers of the District and requested direction from the Board to prepare future discussion once the reports from firms are reviewed. A request was made by Vice Chair Sasso to instruct general counsel to review such material and prepare a report to have ready for the Board at their next meeting.

Item 7.4 – Presentation by Litigation Counsel

Chair Garcia introduced both members presenting as associates of the District's specialized legal counsel to address the concerns against previously discussed agreements.

Mr. David Thompson of Cooper and Kirk presented to the Board his findings on the issues concerning the Developer's Agreement with the Walt Disney Company. Mr. Thompson argued that the agreement was improperly noticed due to lack of mailing requirements as required by Statute, coupled with the failure of the District to put in place proper staffing procedures for review of agreements and declared that the agreement be deemed unconstitutional.

Mr. Alan Lawson of Lawson Huck Gonzalez, presented the District's legislative history in the State and its relationship with the Walt Disney Company and the State of Florida. He cited that the

Developer's Agreement was entered into following Chapter 163 of the Florida Statutes, and the failure of the proper mailed notice under this statute should deem this agreement null and void.

Mr. Thompson then summarized both of their findings and added his concerns about the powers allowed per the agreement and administrative procedures followed for the original adoption of the agreement.

Item 7.5 – Presentation regarding State oversight

Mr. Will Watts of the Florida Department of Transportation (FDOT) presented the role of his agency in the State of Florida and its unique relationship with the District. He addressed the impact the newly created Board could have on the future of transportation options and safety standards for the public.

Mr. Bill McManus of the Department of Business and Professional Regulations (DBPR) presented the role and composition of his agency within the State of Florida. He highlighted the existing agreement with the District for elevator inspections throughout the property similar to other large cities within the State.

Item 8.4 – Discussion and potential action regarding the selection of an urban planning firm and conducting a regional fiscal impact analysis to assist the District in the review and evaluation required by the District’s enabling act.

Chair Garcia explained that to accomplish his vision for future land development for the Board and District, he needed additional support from the Board and asked Supervisor Aungst for his assistance in the selection process. After additional support comments by Vice Chair Sasso, Mr. Langley advised that only one member of the Board should serve to avoid potential Sunshine Law issues. A motion was made by Supervisor Ziegler to select Supervisor Aungst, duly seconded by Vice Chair Sasso and passed unanimously.

Item 8.5 – Board discussion and potential action regarding direction to District staff and legal counsel and priorities of the Board for future agendas.

A motion was made by Supervisor Ziegler, duly seconded by Vice Chair Sasso and passed unanimously.

Electric and Natural Gas Purchases and Sales:

Megawatt hour loads were .6% below plan for the month, the peak load for the month was approximately 1.9% below plan levels as well. Average temperatures for April 2023 were 1.4% higher when compared to the same month in 2022 and 3.1% higher when compared to the average temperatures experienced in 2021. Total cost per megawatt hour (\$/MWh) for the month was approximately 40% below budgeted levels equating to approximately \$1.9M of net electric cost reduction to plan. Lower electric costs were driven primarily by lower Duke RCF purchases because of lower market prices for natural gas resulting in approximately \$.7M in cost savings. Other cost savings were associated with FMPA Tolling, lower cost economy market purchases offsetting more expensive existing contracts, and lower imbalance charges. In general, electric cost reductions were driven primarily from lower market natural gas prices. This trend is expected to continue through the end of FY23.

Natural Gas Distribution and Hot Water:

Actual average natural gas commodity prices were 20% lower than planned for the month, and volumes approximately 8% lower than budgeted levels. The natural gas commodity costs were impacted primarily by the District's existing hedges, lower market commodity prices due to more favorable market fundamentals, increased market drilling / production levels and warmer temperatures. Total District natural gas cost per MMBtu (\$/MMBtu) for the month was approximately 18%, or \$191k lower than budgeted levels. Commodity price volatility in the gas market is expected to continue through FY23 however price levels for RCID will be less impacted due to the District's Risk Management program where approximately 80% of its monthly consumption is hedged for FY23.
